1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-3, 6, 9, 17-19, 22, 25, 33-35, 38, 41 and 49-52 are rejected under 35

U.S.C. 102(e) as being anticipated by Tashiro et al (US 2002/0190215).

Regarding claims 1, 17 and 33, Tashiro et al shows in Fig.10 the following elements of applicant's invention: a plurality of pixels (Fig.9), wherein each of said pixels comprises a reset portion (M2) for resetting a photosensitive element of said pixel, a first storage circuit for storing a reset voltage level of said photosensitive element (paragraph 0091), wherein said first storage circuit further comprises a first sample and hold circuit (M11, CH2), wherein said first sample and hold circuit comprises a first sample and hold transistor (M11) switchably coupling a first terminal of a first storage capacitor (CH2) with said reset portion (paragraph 0091, lines 7-8), and a second storage circuit for storing a voltage level of said photosensitive element after an integration period (paragraph 0090), wherein said second storage circuit comprises a second sample and hold circuit (M8, CH1), wherein said second sample and hold circuit comprises a second sample and hold transistor (M8) switchably coupling a first terminal of a second storage capacitor (CH1) with said reset portion. Regarding claim 33, Tashiro et al discloses an image processor (116) in Fig.23.

Regarding claims 2, 18 and 34, Tashiro et al shows a photodiode (PD) in Fig.10.

Regarding claims 3, 19 and 35, the signal output lines shown in Fig.10 constitute a column bus.

Regarding claims 6, 9, 22, 25, 38 and 41, the limitations therein are shown in Fig.10.

Regarding claims 49-52, the method steps recited therein are inherently disclosed by the device of Tashiro et al.
